

APPLICATION TECHNOLOGY

The adjuvant kit that brings peace of mind.

► GOODSPRAY 1ONE

This complete solution is a water conditioner that enhances spray effectiveness by reducing foam formation, keeping the system clean, and increasing target coverage, resulting in better product absorption by the leaves and reduced drift.

► ALLER BIW

A multifunctional adjuvant that increases target coverage, standardizes drop size, reduces drift, minimizes droplet evaporation, improves product uptake, and sequesters cations.

► GENER ALL

Adjuvant recommended for herbicides, reducing drift, enhancing drop spread on leaves, sequestering cations, standardizing drop size, and improving plant product absorption.

► FORCLEANER

Advanced technology in the decontamination of the spraying system, removing encrusted residues without foaming, preventing phytotoxicity, and preserving sprayer components.

THE COMPANY

Established in 1985, Forquímica® has more than 38 years of experience in agribusiness and a wealth of knowledge acquired through years of investment in its own research. Forquímica® develops sustainable agricultural projects with the support of a highly-qualified field team.

The high economic growth rate and the favorable market conditions in the following years allowed for the diversification of the company, offering services in other market niches.

The Forus Group was created to unify the administration and supply chain of the various companies' products. Together through dedicated work, the 12 companies that make up Forus Group offer the highest quality service and products.

TECHNOLOGY WORKING FOR YOU

Our mission is to be present in all developmental stages of agricultural crops in the field, to reach maximum productive potential of crops and to exceed expectations throughout the production process.

We are engaged in collective and daily work in the field, where our technical and commercial teams are distributed and organized in various regional offices throughout Brazil, Paraguay, Bolivia, Argentina, Uruguay, Mexico, Colombia and the United States. They are managers, consultants, agronomists, technicians and distributors with a single objective to provide you, the farmer, with the necessary technical advice to deliver better-than-expected results with every project.

In this way, we build a prosperous and lasting relationship with our partners, based on the service of our team and the quality of our products and services.

All this to always produce more alongside you.

ABOUT US

→ MISSION

Transform our clients' lives with innovative projects and services.

→ VISION

To be recognized as a leader in reference on technology and innovation.

→ VALUES

Customer-focused quality; Credibility in relationships; Appreciation and respect for life; Research and innovation; Respect for the environment; Gratitude to God.
